Location: Cirencester

Customer Requirement: Diesel engine with parts and service support capability

Equipment: Perkins power pack engine to suit all applications

Services: Engineering, equipment installation, after-sales support

Customer Information

Godwin Pumps offers an extensive range of pumps for sales and rentals including; Dri-Prime® fully automatic self-priming pumps, electric and hydraulic submersible pumps, diesel and electric fire pumps and portable light towers.

A century of design, manufacture and supply has earned Godwin Pumps global presence in industries such as construction, industry, oil refineries, chemical plants, mines, heating and ventilating, irrigation, and water distribution.

Established over 100 years ago, Godwin Pumps has built a reputation of design excellence and quality service; two characteristics they have come to require from *Diperk*.

Customer Solution

After careful analysis, *Diperk* specified 2 different ranges of Perkins power pack engines, chosen as the power requirement would allow for all applications of pumping; whether it be, EG water, slurry, mud, oil or stony water. The 400D range offers a compact unit with no compromise on power whilst the 1100D series offers a wide choice of build options.

Diperk built and installed over 400 complete power pack units in 2007/2008 for Godwin. As part of the solution, parts support

is provided for the end user and technical advice is readily available when required.

Why Diperk?

- The UK's Perkins engine expert
- Unrivalled reputation of Perkins engines
- Engineering capability allows the product to be customised to suit application industry
- Parts and aftermarket support, including next day delivery on parts and emergency call out if required
- Equipment installation and rigorous testing
- In depth product and technical knowledge
- Perkins world-wide product and parts warranty
- UK built product

"Installation appraisal sign off by *Diperk* provides confidence in completed product capability".
